

# Testing

Tailwind for your visions

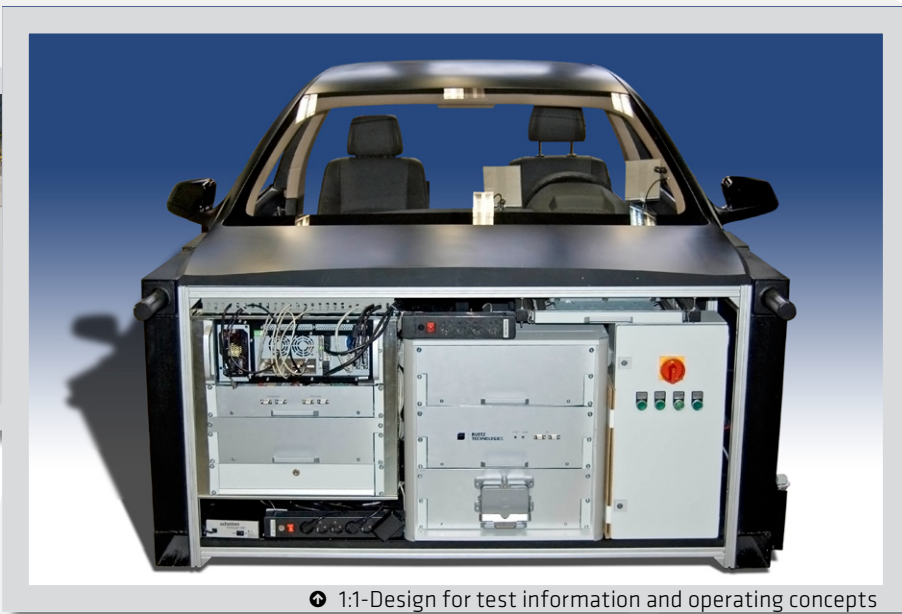

## Range of Services

- Project support, technical support on-site
- Control device simulation in networks
- Development of control devices: rapid prototyping, prototype and manufacturing
- Development and visualisation of measuring, testing and control software as well as user interfaces
- Test case generation & protection
- Validation and verification
- HW/SW link-up to bus systems (LVDS, CAN, MOST, LIN, FlexRay)
- Test station development and manufacturing
- Vehicle reconstruction, construction of test carriers

## Our Company

RUETZ TECHNOLOGIES GmbH has been a development service provider since 1982 with a main focus on engineering. More than 130 strongly committed members of staff from various areas of specialisation guarantee the production of rapid and interdisciplinary solutions for your state-of-the-art technologies. You can find us in Munich (company head office), Hamburg, Ingolstadt and Stuttgart.

TECHNOLOGIES**

## Testing and Simulation Systems

- HiL test facilities
- Component testing
- BUS conversion solutions/collectors
- Measuring superstructure for vehicle integration
- Evaluation and conceptual superstructures
- Control devices for specific testing applications (LVDS, MOST, CAN )
- Test equipment for control device simulation
- Partial system network test stations
- System test stations for component lifetests
- Mobile testlab superstructures
- Cable harness design, test adapter, needle adaptation

## Your benefits:

- From concept to production – we'll take charge of everything
- Development and consulting
- Engineering made in Germany
- Development services also on your premises
- All services and products certified according to the quality standard DIN EN ISO 9001:2008
